

AP Computer Science Principles

Welcome to our class! Please complete the following:

1. Please complete the following module on Khan Academy: [Computing Innovations](#)
When you are finished, screenshot your progress to show that you earned all 300 mastery points. You'll upload your screenshot to our Google Classroom. Here's an example (except I didn't complete the whole thing, so I won't earn credit for it!)

2. Please use this [link](#) to check out code.org. You should complete lessons 1-6. Take a screenshot of your progress once you've finished each lesson. You don't need to create an account, but if you don't, your progress won't be saved.

- 3.

I'll have our Google Classroom set up by July 1, 2023. Please join it once you've been invited!
